DETAILED ACTION

1. Claims 1-23 are allowed.

Drawings

2. The drawings filed on January 26, 2004 are accepted by the Examiner.

REASONS FOR ALLOWANCE

3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "a sortation memory portion provided in a form of a virtually sorted, prescribed memory area to store information sorted by each prescribed condition for said prescribed condition"; "a comparison and display portion comparing the additional information acquired by said acquisition portion from said different image processing apparatus with the additional information added by said information adding portion to said sortation memory portion, and displaying similar additional information; and a registration portion selectively registering one of the additional information displayed by said comparison and display portion and the additional information added by said information adding portion to said sortation memory portion, to allow the image processing apparatus and the different image processing apparatus to share said

Art Unit: 2167

sortation memory” as recited in independent claim 1 and similarly recited in independent claims 4 and 11.

As per claim 13, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including “a decision portion deciding whether there exists in the image processing apparatus of interest additional information added by said information adding portion to said sortation memory portion that is identical to additional information acquired by said acquisition portion from said different image processing apparatus; and an erasure portion driven by a result of a decision made by said decision portion and the additional information acquired by said acquisition portion from said different image processing apparatus to erase said stored in said sortation memory portion that is associated with the additional information acquired by said acquisition portion from said different image processing apparatus, to allow the image processing apparatus and the different image processing apparatus sharing said sortation memory to erase appropriate information” and similarly recited in independent claims 14, 15, and 23.

As per claim 16, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including “a return notification operative in response to a request from said first image processing apparatus by said request portion to return to said first image processing apparatus said information stored in said sortation memory portion; and a second storage portion storing to said sortation memory portion said information returned by said return notification portion from said second image processing portion,

Art Unit: 2167

to allow the first image processing apparatus and the second image processing apparatus to share said sortation memory” and similarly recited in independent claims 20-22.

As per claim 17, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant’s invention nor anticipate the combination of claimed elements including “a transmission portion driven by said printing instruction received by said instruction reception portion from said communication terminal to transmit to a different image processing apparatus said information stored in said sortation memory portion, to allow the image processing apparatus to print information stored in the different image processing apparatus”.

The remaining claims, 2, 3, 5-10, 12, 18, and 19, are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
